## Installation

Slide CAMO® into rail channel far enough to clear the module frame. CAMO® requires 6" of clearance from end of rail.

Place module on rails (module cells not shown for clarity).

Pull CAMO® towards rail ends, at 45 deg angle, so the bonding bolt contacts the module flange edge.

Rotate handle with an upwards motion until CAMO® snaps into rail channel. Ensure Camo bonding pins are fully seated on top of module frame.
