RE: Ironridge Flat Roof Attachment

To Whom It May Concern:

This letter is to serve as confirmation that the Ironridge Flat Roof Attachment may be used as an attachment point for roof mounted equipment systems on warranted Firestone TPO roofing installations, provided the flashing work is completed by a Firestone licensed applicator to current Firestone specifications.

This letter is not an endorsement or representation of any warranty regarding watertight integrity or the overall performance of the Ironridge Flat Roof Attachment itself.

The installation of the Ironridge Flat Roof Attachment will not void the Firestone Roofing System Warranty; however, any damage or leaks caused by the Ironridge Flat Roof Attachment will not be covered by the Firestone Roof System Warranty, and it will be the responsibility of the Building Owner to make repairs with a Firestone licensed contractor. The building owner is required to complete and submit a Firestone Overburden Waiver (<http://firestonebpc.com/tools/building-owners-toolbox/>) for any Firestone Warranted Roofing System utilizing the aforementioned product.

Feel free to contact the Firestone Building Products Technical Department at 800-428-4511 for additional information.

Sincerely,

A handwritten signature in black ink, appearing to read "Russell Broadhurst".
